Hi-FUMOST Disinfectant

Hygiene Safety for Animal Health, the Food Industry and Public Health

The Product

Hi-FUMOST is a bacterial, fungicidal and virucidal disinfectant containing Ortho-PhenylPhenol (30%). Aerial and surface disinfectant for use in domestic, medical, agricultural, commercial and industrial premises.

Why use Hi-Fumost?

- Effective treatment against bacteria, moulds and viruses in any enclosed area.
- Low residue level.

- Quick, easy-to-use application.
- Dry disinfectant - no corrosion risk.
- Pre-dosed tins with uniform dispersion.
- Safe for operators with limited exposure.
- Lower quantities of biocide are required than to spray the same area.
- Animals / food / crops not present during treatment.

Benefits

Proven efficacy against major pathogens.
Aerial and surface disinfection.
Enters all cracks and crevices in the treated area.
Ready-to-use: no mixing or equipment needed.
Self-contained and pre-dosed tins for uniform dispersion.
Reaches inaccessible areas for thorough treatment.
Low operator and animal exposure.
Low groundwater contamination means low environmental impact.
Does not affect humidity, avoiding fungal growth.
Reduces disinfecting handling costs.
Dispersion with minimal chemical use and optimal results.
Reduced risk of cross contamination of surfaces and equipment.
Consistent particle distribution (from 5µm to less than 0.1µm).

For use in:

Animal health

Suitable for: farms, animal breeding facilities, kennels, poultry sheds, and hatcheries.

Storage areas

Silos, feed mills, machinery and vehicles must all be regularly cleaned and disinfected to ensure optimum hygiene and safety. Hi-FUMOST is a non-corrosive dry disinfectant that effectively treats inaccessible areas such as roofs, cracks, crevices and machinery ensuring a thorough treatment.

Food industry

Disinfection with Hi-FUMOST throughout the food chain is an efficient method of controlling biocontamination and fighting against pathogenic food poisoning organisms.

Public health

A major danger to the health of a property and its inhabitants is mould growth. Most properties have mould in some form - often hidden behind surface finishes, in voids and within shared partitions. Eradicate mould and associated spores with Hi-FUMOST in hospitals, ambulances, hotels, gyms and pools, public buildings, and offices.

Pre-dosed Tins

Size (grams)	Active ingredient (grams)	Coverage (m ³)
20	6.0 active	20-40 m ³
30	9.0 active	30-60 m ³
60	18.0 active	60-120 m ³
100	30.0 active	100-200 m ³
200	60.0 active	200-400 m ³
400	120.0 active	400-800 m ³
500	150.0 active	500-1000 m ³
1000	300.0 active	1000-2000 m ³
